About me

I am a computer science student with a passion for IT and development. Much of my free time goes with my passion for DIY projects (building things myself). I've always graced myself on being someone, who can do a bit of everything, whether it's programming, 3D printing and modeling, mechanics or any craft for that matter. Other than that, my time is used with friends, family and training. I have a background in automobile industry, but due to an increasing interest in the IT industry, I chose to take the plunge and change.

Skills and abilities

PROGRAMMING

- **Languages:**
 - Beginner: Python
 - Intermediate: Java | JavaScript | Android
- **Database:**
 - Beginner: Firebase | AWS EC2 | MongoDB
 - Intermediate: MySQL
- **IDE:**
 - Beginner: Visual Studio | JetBrains
 - Intermediate: IntelliJ | Visual Studio Code | jGRASP | Android Studio
